Professional Summary

Motivated and skilled Web Developer with a strong academic foundation, holding an Associate's degree in Electronics and a Bachelor's degree in Computer Engineering. Proficient in HTML, CSS, Bootstrap, JavaScript, TypeScript, React, Angular, Node.js, and MongoDB, with hands-on experience in both frontend and backend development. Enthusiastic about emerging technologies with introductory knowledge in Python-based Artificial Intelligence and the Internet of Things (IoT). Eager to continuously learn and contribute to innovative web solutions.

Areas of Expertise

❖ HTML

- Expertise in structuring web pages with semantic HTML to enhance accessibility and SEO.
- Skilled in writing clean, efficient, and maintainable HTML code, following best practices.

❖ CSS

- Strong proficiency in designing visually appealing and responsive layouts using CSS.
- Experienced in implementing advanced CSS techniques such as Flexbox, Grid, and custom animations to improve user experience.

❖ Bootstrap

- Deep understanding of the Bootstrap framework for building responsive, mobile-first websites.
- Able to customize Bootstrap components to suit specific project requirements, ensuring consistent design across platforms.

❖ JavaScript

- Proficient in implementing interactive and dynamic features on websites using vanilla JavaScript.
- Experienced with modern JavaScript tools and libraries (React, Angular) for building scalable front-end applications.
- Knowledgeable in asynchronous programming, leveraging promises and async/await for optimized performance.

- ❖ **TypeScript**
 - Proficient in TypeScript for creating strongly-typed, error-resistant code, enhancing project scalability.
 - Familiar with integrating TypeScript into JavaScript-based frameworks to improve code quality and maintainability.

- ❖ **React & Angular**
 - Expertise in developing modern, component-based web applications with React and Angular.
 - Skilled in state management techniques, including Redux for React and services in Angular, to ensure efficient data flow and app scalability.

- ❖ **Node.js**
 - Strong proficiency in back-end development with Node.js, creating scalable and high-performance server-side applications.
 - Experienced in using Express.js to build RESTful APIs and handle HTTP requests seamlessly.

- ❖ **MongoDB**
 - Expertise in managing and optimizing NoSQL databases with MongoDB for handling large-scale data.
 - Proficient in designing database schemas, performing CRUD operations, and implementing data indexing for efficient queries.

- ❖ **Version Control (Git & GitHub)**
 - In-depth experience using Git for version control to manage source code changes and collaboration on projects.
 - Skilled in using GitHub for repository management, code sharing, and performing code reviews with teams.

- ❖ **Problem Solving & Debugging**
 - Strong analytical skills with the ability to debug complex issues across both front-end and back-end code.
 - Proficient in troubleshooting performance bottlenecks and optimizing web applications for speed and efficiency.

- ❖ **AI with Python (Introductory Knowledge)**
 - Familiar with the basics of machine learning and artificial intelligence concepts in Python.

❖ **Internet of Things (IoT)**

- **Introductory understanding of IoT technologies, including the integration of physical devices with web applications.**

EDUCATION

❖ **Associate's Degree in Electronics**

- **Institution: Amir Kabir Technical and Vocational University, Arak**
- **Duration: 09/2020 – 01/2023**
- **Focus: Fundamentals of electronics, circuit design, and practical implementation of electronic systems.**

❖ **Bachelor's Degree in Computer Engineering (Software)**

- **Institution: Shahid Jabarian Technical and Vocational University**
- **Duration: 11/2023 – 03/2025 (Expected)**
- **Focus: Web development, front-end and back-end programming, modern software engineering practices, and learning in the fields of Artificial Intelligence and Machine Learning.**

ADDITIONAL SKILLS (ENGLISH VERSION)

❖ **Languages**

- **Kurdish: Fluent**
- **Persian: Fluent**
- **English: Proficient (Writing)**
-

❖ **Front-End**

- **Responsive web design, wireframing, and prototyping.**
- **Proficient in HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS.**
- **Tools: Figma, Adobe XD.**

❖ **Back-End**

- **Proficient in Node.js, Express.js, and MongoDB.**
- **RESTful API development and integration.**
- **Authentication (JWT, OAuth)**

❖ **Software Engineering**

- **Version control (Git), agile methodologies, clean and maintainable code.**

❖ **AI & Machine Learning**

- **Basic knowledge of AI/ML with Python.**
